Work rights: NZ Post study work visa, valid until 31-01-2029

SUMMARY

Graduate Software Developer with experience building full-stack web applications, RESTful APIs, cloud-native solutions, and business systems. Experienced in developing React frontend UI, C#/.NET backend services, RESTful APIs, PostgreSQL databases, and AWS cloud solutions, with hands-on experience in Docker, Git, and Agile development. Backed by 2+ years of Business Analyst experience, I combine strong software engineering skills with business analysis expertise to translate business requirements into scalable technical solutions and collaborate effectively with cross-functional teams.

SKILLS

Programming Languages: Java, C#, JavaScript, TypeScript, Python

Frontend: React, React Native, Next.js, Svelte

Backend & APIs: Node.js, Ruby on Rails, ASP.NET Core MVC, RESTful APIs, Microservices

Databases: PostgreSQL, SQL Server, MongoDB

Cloud & DevOps: AWS (Lambda, EC2, S3, Bedrock), Docker, Git, CI/CD

WORK EXPERIENCE

Business Systems Developer

April 2026 – Present

Amplify Studio

Auckland, New Zealand

- Analysed business requirements and designed business system solutions supporting property sales, construction, warranty, maintenance, and homeowner service workflows.
- Designed relational Airtable database architecture and developed Softr customer portals, REST API integrations, webhooks, and custom JavaScript code to automate end-to-end business processes.
- Built and maintained multi-step workflow automations using Make.com and Airtable Automations, integrating third-party systems to streamline reporting, notifications, approvals, and operational workflows.

Web Development Intern

February 2026 – April 2026

Datacom

Auckland, New Zealand

- Developed backend services and RESTful APIs using Ruby on Rails, PostgreSQL, and Sidekiq to support CRUD operations and asynchronous background jobs.
- Built responsive user interfaces using React, JavaScript and MUI libraries, including admin pages, notification banners, and customer feedback features.
- Collaborated in an Agile team throughout the SDLC, participating in sprint planning, Git-based code reviews, testing, documentation, and UAT.
- Built automated unit and integration tests to improve application reliability and support continuous delivery.

Shopify Developer (Part Time)

July 2025 – April 2026

Happy Valley Honey

Auckland, New Zealand

- Developed reusable Shopify theme components, product pages, and collection pages using Liquid, JavaScript, HTML, and CSS, enhanced the UI and shopping experience.
- Integrated Shopify with third-party services through APIs to support payments, marketing, inventory management, and operational workflows.
- Optimised frontend performance through responsive design, code optimisation, and efficient asset loading, improving page load speed and mobile usability.

Associate Business Analyst

September 2021 – November 2023

Infor

Shanghai, China

- Partnered with finance, procurement, and supply chain stakeholders to gather, analyse, and document business requirements for ERP implementation and enhancement projects.
- Produced functional specifications, business process documentation, process flows, configuration guides, data mappings, and UAT materials to support solution delivery.
- Collaborated with developers to translate business requirements into ERP configurations, assess solution impacts and dependencies, and support implementation throughout the project lifecycle.
- Led client workshops, requirements walkthroughs, solution demonstrations, and end-user training to validate business needs and align stakeholders.
- Configured and supported Infor ERP finance and supply chain modules, investigated system issues, performed root cause analysis, and recommended process and system improvements.
- Planned and coordinated functional testing and UAT, managed defect resolution, verified fixes, and supported successful go-live and post-implementation activities.

EDUCATION

Master of Information Technology with First Class Honours (CGPA 7.94)

February 2024 – May 2025

University of Auckland

Auckland, New Zealand

Bachelor of Commerce, Major in Finance

September 2018 – May 2021

McGill University – Desautels Faculty of Management

Montreal, Canada

TECHNICAL PROJECTS

Cloud Native Insurance Claims Automation Platform

July 2025 – October 2025

AWS cloud services, JavaScript, Node.js, React, Tailwind CSS, MongoDB (NoSQL Database)

- Analysed the existing insurance claims process and designed a digital solution to automate claim submission, document validation, and processing workflows.
- Developed and deployed a cloud-native insurance claims application on AWS, using EC2 for application hosting and Lambda with API Gateway to implement scalable event-driven processing.
- Designed and developed an Agentic AI solution using AWS Bedrock that combined RAG, business rules, and structured claim data to generate confidence assessments and contextual customer responses.
- Participated in peer code reviews, testing, and iterative refactoring to improve code quality, maintainability, and software reliability.

Full-Stack Flip Card Web Application

March 2025 – May 2025

C#, ASP.NET Core MVC, React, TypeScript, SQL Server

- Designed and developed a full-stack web application using C#, ASP.NET Core MVC, React, TypeScript, and SQL Server, implementing RESTful APIs and secure CRUD functionality.
- Developed backend services, business logic, and API endpoints following MVC architecture, object-oriented programming principles, and dependency injection.
- Designed relational database schemas and optimized SQL queries to support efficient data storage, retrieval, and application performance.
- Applied layered architecture, reusable software design principles, and Git-based collaboration to build scalable and maintainable application components.
