SUMMARY

Graduate Software Developer with industry internship experience, skilled in full-stack development and AWS cloud services. Experienced in using AI to automate business processes and streamline development and testing workflows. Proven ability to translate business requirements into functional solutions, backed by 2+ years of enterprise consulting experience. Passionate about building meaningful software that drives real business value.

SKILLS AND CERTIFICATES

Tech Stacks: JavaScript/TypeScript, Java, Python, Node.js, React, React Native, Ruby, PostgreSQL, MongoDB, REST APIs
Cloud & DevOps: AWS (Lambda, S3, Amplify, Cognito, Bedrock), Docker, Git, CI/CD, Jira, Confluence
Certificates: AWS Academy Cloud Architecting Graduate, Infor Engage End-to-End Process

WORK EXPERIENCE

Web Development Intern **Feb 2026 – Apr 2026**
Datacom *Auckland, New Zealand*

- Developed full-stack features for the Data Centre's web portal, including a configurable notification banner, admin settings page, and user feedback workflows. Implemented functionality across the stack using React UI components, Ruby on Rails controllers, PostgreSQL schemas, RESTful APIs, and Sidekiq-based automated email workflows.
- Worked in an Agile environment with daily stand-ups and sprint cycles. Participated in the full development lifecycle from Confluence design documentation and Jira ticket creation to verification, business criteria definition, end-user testing, and system/UAT validation.
- Collaborated with team members to clarify UI design requirements, troubleshoot bugs, and refine feature implementations, proactively enhancing code reusability and feature quality.

Associate Consultant (ERP) **Sept 2021 – Nov 2023**
Infor *Shanghai, China*

- Gathered and analyzed business requirements from manufacturing clients to configure ERP finance and supply chain modules aligned with operational workflows.
- Translated business needs into functional specifications, acting as a liaison between stakeholders and development teams to support custom feature development.
- Produced structured documentation to support system configuration, implementation, and knowledge transfer across teams.
- Collaborated with developers to validate system functionality through unit and end-to-end testing, ensuring alignment with defined business requirements.
- Led and supported User Acceptance Testing (UAT) by developing test cases, coordinating validation activities, and facilitating stakeholder feedback and issue resolution.

TECHNICAL PROJECTS

Insurance Claims Automation (Agentic AI, AWS Deployment) **Jul 2025 – Sept 2025**
Team Project – AWS (Cognito, S3, EC2, Bedrock, Lambda), Node.js, Tailwind CSS, MongoDB Atlas, Vitest

- Designed a cloud-native claims processing solution to automate the document validation process and reduce manual review workload.

- Developed a Confidence Scoring Agent using AWS Lambda within a serverless architecture to automatically evaluate claim confidence levels and support decision-making in the processing workflow.
- Implemented an Agentic AI chatbot using AWS Bedrock with RAG, integrating knowledge bases and database retrieval. Tested multiple LLM models to optimize response quality, performance, and cost.
- Developed automated backend testing using Vitest to validate API endpoint functionality and reliability.
- Contributed to peer code reviews and iterative refactoring, improving code quality, reusability, and maintainability.

Pet Reporting Web Application (MERN-Stack) **May 2025 – Jul 2025**

Team Project – React.js, Node.js, React Leaflet, Tailwind CSS, MongoDB Atlas, AWS S3, Render

- Developed a full-stack application using Node.js (Express) and React for real-time reporting of sightings, using React Leaflet to provide an interactive map interface.
- Built a seamless integration feature to link spot entries to profiles, including geolocation support and AWS S3-based image storage via robust APIs.
- Designed and implemented scalable REST APIs to integrate frontend services, geolocation data, and cloud storage, with a focus on maintainability and error handling.

Daily Joke Application (Mobile) **Mar 2025 – Apr 2025**

Individual Project – React Native, Expo, MongoDB Atlas

- Architected and developed a cross-platform mobile application using React Native and Expo framework. Developed CRUD functionality for interacting with data stored in a cloud-hosted MongoDB database.
- Implemented a user interface with intuitive swipeable UI and animated gesture controls.

EDUCATION

Master of Information Technology (CGPA 7.94) **Feb 2024 – Nov 2025**

University of Auckland *Auckland, New Zealand*

Bachelor of Commerce, Major in Finance **Sept 2018 – May 2021**

McGill University – Desautels Faculty of Management *Montreal, Canada*

OTHER ACTIVITIES

Marketing and Sales Assistant *(Part-time)* **May 2024 – Present**

NZ Honey Group *Auckland, New Zealand*

- Customized Shopify theme templates using HTML/CSS to develop new product and promotional pages and implement website UI updates.
- Collaborated with the marketing team to refine UI elements and ensure alignment with product branding and design standards.
- Managed product data within the Shopify admin system, maintaining listings, descriptions, and media assets.
